Q.6. Describe how you would feel if you had to go on a long journey by yourself.

Comprehension:

Read the following passage carefully and answer the questions that follow.

Choose the correct answer and write its number in the brackets.

One of nature's most wonderful gift to mankind is the waterfall. Waterfalls are caused by a sudden and steep drop in a river. They are not only beautiful but useful as well. For years, people all over the world have depended on them to produce electricity to run their mills and factories.

Waterfalls present breath-taking sights. They are found in many parts of the world. Many Singaporeans travel all the way to Kota Tinggi in Malaysia to look at the beautiful waterfall. Those who go on holiday to America, never fail to visit the Niagara Falls, one of the wonders of North America. In Africa, visitors get to watch the famous Victoria Falls. Perhaps, the greatest wonder is the Angel Falls in Venezuela, one of the highest waterfalls in the world. It falls from a height of some one thousand metres.

The most amazing waterfall is the one in New Brunswick, Canada. It is called the Reversing Falls of St. John. During high tide, the waterfall actually reverses. Water from the bay appears to rush up the waterfall. Visitors often could not believe their eyes because waterfalls are not supposed to flow upwards. This astonishing sight has attracted millions of people.

- Q.1. Waterfalls are used _____
- a) for swimming and other water activities.
 - b) to produce hydroelectricity.
 - c) as a means of transport
 - d) to make visitors happy.
